

Responsibilities

- You will actively manage a portfolio of key sellers that need to be integrated onto the Amazon marketplace platform.
- You will engage external customer teams to define requirements, test data integrity, verify business processes, and deploy product offerings.
- You will work with partners to set and meet milestones and deliverables to deliver high-quality integration projects every time.
- You will gather requirements and help us build the tools and processes to increase the ease and efficiency with which partners integrate with us.
- You will support the launches of new programs, categories and features.

Qualifications

- MBA or MSc in computer science, maths, or engineering. MBA with strong technical background.
- Fluency in spoken and written French and English is essential. Good level of German will be a strong asset.
- Clear understanding of eCommerce and B2B Communication (XML and Webservices).
- Advanced computer literacy especially in Microsoft Office applications.
- Desire to work in a fast-paced, challenging environment is required.
- Excellent communication skills with the ability to face external and internal partners in a professional and mature manner.
- A track record of managing and troubleshooting technical and business integration projects.
- Attention to detail and high capability to work on different projects in parallel.
